Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/24/03 has been entered.

NOTE: Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Drawings

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 2/24/03 have been disapproved because they introduce new matter into the drawings. 37 CFR 1.121(f) states that no amendment may introduce new matter into the disclosure of an application. The original disclosure does not support the showing of wheel 50 being engaged with 7' and 5'.

NOTE: Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Claim Rejections - 35 USC § 102

Art Unit: 3729

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15-20, 25 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Genov et al (US 5,064,340).

Genov discloses 32 is a chip gripper; 12 and 18 levers; toothed wheels and belts (Fig. 5) moves 32, 12 and 18; a plurality of shafts as Fig. 1; a drive mechanism is housed in 38; levers arranged with toothed wheels and belts provide various different angles between levers; and 32 is rigidly connected to the opposing end of the second pivoted lever by a shaft, bearings and screws (Fig. 1).

NOTE: Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3729

6. Claims 21-24 and 26-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Genov et al (US 5,064,340) in view of Parker (US 5,934,147).

Genov fails to disclose delimiters and 1:3 gear ratio.

Parker discloses Fig. 3 shows delimiters thereby limiting the rotational movement of the gripper to allow for picking up heavy or odd size electronic components at certain locations of the apparatus' reach without manipulating any one of the levers.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Genov by providing delimiters, as taught by Parker, for the purpose of limiting the rotational movement of the gripper to allow for picking up heavy or odd size electronic components at certain locations of the apparatus' reach without manipulating any one of the levers.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to provide a gear ratio of 1:3 because Applicant has not disclosed that such gear ratio provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the gear and toothed belt system as taught by Genov because the outcome of the apparatus is the same.

NOTE: Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Response to Arguments

Art Unit: 3729

7. Applicant's arguments with respect to claims 15-40 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. **Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**
